About me

I am a motivated and reliable student currently pursuing a degree in Games Development at Manchester Metropolitan University. I have 6 years of programming experience and 3 years experience with various game engines, mainly unity. I have a passion for game development and hope to one day pursue a career in games programming.

EXPERIENCE

Gadget, Oldbury – Warehouse Operative

October 2022 – February 2023

Solo Game Development Projects

Team Game Development Projects

I have experience working as part of a team on various projects, especially in university.

Why I would be a good fit

I believe I would be a great fit in Team 17 because I am a confident game developer with a passion for making games. I am also reliable and not afraid to admit I need help. I have past experience with various languages and game engines, with C# and unity being my most used. Because of this I am confident and quick to learn when seeing unfamiliar areas. I take pride in game development, whether it's designing a fun system or working on time-consuming tasks. I'm also currently studying at university, and I'm looking for a part-time role where I can bring a positive attitude and strong

SKILLS

- Programming
- Python
- C++
- C#
- Programming
- Proficient in Github
- Unity/Unreal Engine
- Teamwork
- Collaboration

Why me?

I bring a strong work ethic, clear communication, and the ability to quickly adapt to new tools and workflows. My academic path reflects my ambition and passion for game development.

Interests

Fitness: Committed to the gym for 4+ years, developing discipline, goal-setting, and

work ethic to the team.

perseverance.

Game development:

Passionate about coding and designing interactive experiences, with a strong interest in entering the games industry.

Music : love seeing live music performances.
